

STEM Fair
at the
Birmingham
Science
Park

Here we are in May, awaiting the scorch of Spring. Once again we have been hard at work, being fantastic scientists! Y5's exciting trip to the Birmingham Science Park at Aston University was a wonderful day.

Many exhibitors attended the fair to present their STEM projects. Our STEM project was to make a communications tower using mini marshmallows and spaghetti. We also presented the bridges we made.

**Subject:
STEM Fair**

A group of students from Aston University had designed and built a remote-control vehicle which William had great fun trying out!

Adam and Ella were asked to have their picture taken while in a Formula 1 Racing Car signed by the team!

We really enjoyed using the Van der Graaff generator which King Edward's School were demonstrating. Year 5 represented St Chad's really well at the STEM fair.
